

Electronic Payment Setup Form Message - Possible Processing Delay

Possible Processing Delay

An E-Pay processing attempt did not succeed. The system will auto retry but there may be a slight processing delay.

This means that the service the ISS Portal needs to submit your banking information to is currently busy. Your form submission has been received and there is no error. It will be sent as soon as connectivity is restored. There may, however, be a delay in your information being verified as a result.
